

# H.A.L.T.

HEALTH ALERT LIVE TEMPERATURE

TEMPERATURE  
•  
DETECTION

## Safety Detection

### Functions

- Visual display on screen
- Infrared non-contact temperature reading (within 0.2 seconds, 0.5° C range of accuracy)
- 1 – 6ft detection range (3 people / second)
- Green light temperature pass, red light fail
- Mask detection if required
- Facial recognition
- Portable system, built in stand (floor or desk top)
- Programmable, adjustable thresholds
- Suited for high-contrast lighting environments
- Reduces temperature scan times with manual systems
